Source: Bloomberg, country exchanges and Zawya (** Trailing Twelve Months; * Value traded (\$ mn) do not include special trades, if any; # Data as of June 17, 2026)

- **QCB keeps key interest rates unchanged** - The Qatar Central Bank (QCB) on Wednesday announced its decision to maintain current interest rates for deposits, loans, and repurchase agreements following a review of the country's monetary policy conditions. In a statement posted on its official X platform, the QCB said the deposit rate (QCBDR) will remain unchanged at 3.85%, while the lending rate (QCBLR) will stay at 4.35%. The repurchase rate (QCB Repo Rate) was also maintained at 4.10%. (Qatar Tribune)
- **FTSE Global Equity Index Series June 2026 Quarterly review changes effective today; Marginal aggregate net outflows expected** - FTSE Russell Global Equity Index Series Quarterly review, published on May 22nd, 2026, become effective today at the close of June 18th, 2026, for the Qatari market. The details of the review for Qatari stocks are as follows: **Additions: Mosanada Facilities Management Services QPSC to Microcap Segment.** Deletions: None. Reclassifications: None. The review results will be effective at the close of June 18th, 2026, for the Qatari market. **Overall, we expect marginal net outflows of less than \$5mn due to weight changes of various stocks.** Today's FTSE trading, coincide with the global expiration of MSCI futures which could elevate market volatility. (QSE, QNBFS)
- **Dandy announces the offering of its shares through the book-building mechanism and its listing on the Main Market of the Qatar Stock Exchange** - Dandy Ltd Company (Q.P.S.C.) (under conversion), the Qatari company specializing in the manufacture and distribution of dairy, beverage and ice cream products for more than 45 years, announced that it has obtained the approval of the Qatar Financial Markets Authority (QFMA) to proceed with offering 40% of its share capital to institutional and individual investors, with the offer price to be determined through the book-building mechanism. The book-building process will be conducted under the Offering, Listing, Mergers and Acquisitions Rules issued by the Board of the QFMA pursuant to Decision No. (8) of 2025, as part of a package of measures designed to attract more companies and provide diverse options for those seeking to offer and list on the capital market. This offering reflects the continued collaboration between the Qatar Financial Markets Authority and the Qatar Stock Exchange to develop the market's regulatory framework and broaden the options available to companies seeking to list. It is worth noting that the book-building mechanism is used in global markets and in many markets across the region to determine the offer price by relying on institutional investors who possess the expertise, knowledge and tools necessary for the fair pricing of a security. The Company intends to conduct the offering in two phases: Offering shares to institutional investors through the book-building mechanism in accordance with the timeline approved by QFMA comprising 12,360,000 shares, representing 30% of the Offer Shares. Offering shares to the public — to individual Qatari nationals and entities incorporated in the State of Qatar, based on the price determined through book building comprising 28,840,000 shares, representing 70% of the Offer Shares. The Company has stated that the price per Offer Share (excluding offering and listing fees) is expected to be determined through the book building process within a range of QR5.00 to QR5.20 per share. (QSE)
- **QNB Group to disclose its Semi-Annual financial results on 08/07/2026** - QNB Group discloses its financial statement for the period ending 30th June 2026 on 08/07/2026. (QSE)
- **QNB Group share buyback suspension update** - QNB Group has announced that, in accordance with the instructions of the Qatar Financial Markets Authority, it will suspend its share buyback activities during the period starting from [18/06/2026] to [08/07/2026], due to the upcoming disclosure of its (First Half) financial results for the year [2026]. The share buyback program will resume on [09/07/2026]. (QSE)
- **Moody's affirms long-term ratings of eight Qatari banks** - Moody's Ratings affirms long-term local and foreign currency deposit and issuer ratings of eight Qatari banks and maintains stable outlooks on their long-term ratings. These banks are Qatar National Bank, The Commercial Bank, Doha Bank, Qatar Islamic Bank, Dukhan Bank, AlRayan Bank, Qatar International Islamic Bank and Ahli Bank. Moody's also affirms the Baseline Credit Assessments, Adjusted BCAs, Counterparty Risk Ratings and Counterparty Risk Assessments of all banks. Affirmation reflected strong capital and liquidity buffers that can absorb expected deterioration in operating conditions, Moody's says. Ratings incorporate a very high likelihood of government support based on Qatar's Aa2 stable sovereign rating, Moody's says. (Bloomberg)
- **Confirmation of credit rating of Qatar Islamic Bank at A1 by Moody's** - Qatar Islamic Bank has announced that Moody's has confirmed the credit rating at A1 with a Stable Outlook. (QSE)
- **Confirmation of credit rating of Qatar International Islamic Bank at (A2) by Moody's** - Qatar International Islamic Bank has announced that Moody's has confirmed the credit rating at (A2). Moody's affirmed QIIB's long-term issuer ratings at (A2) and the baseline credit assessment (BCA) at (Baa3) with stable outlook. (QSE)
- **GWC announces the formation of new subsidiary companies and the renaming of one of its existing subsidiaries** - Gulf Warehousing Company Q.P.S.C. (GWC), hereby discloses the following developments within the Group: 1. Establishment of GWC Express Trading LLC – United Arab Emirates; 2. Establishment of GWC Biosafe for Hazardous Transportation WLL – State of Qatar; 3. Change of the name of Prime Inspection Services to GWC Busulba Logistics Services WLL – State of Qatar; 4. Establishment of GWC Energy Logistics LLC – Sharjah Branch 1 – United Arab Emirates. These steps come within the framework of the Group's strategy to expand its operations and diversify its logistics services across the region. There is no material impact expected on the Company's financial statements as a result of the above. (QSE)
- **QCB issues government Ijara sukuk worth QR6.5bn** - The Qatar Central Bank (QCB) issued on Tuesday Government Ijara sukuk on behalf of the Ministry of Finance with a value amounting to QR6.5bn, reports QNA. In a post on X, the QCB said that the maturity periods of the Sukuk varied as per the following details: QR3.250bn (an addition to an existing issuance) with a maturity date of September 3, 2028, and a yield of 4.450%, and QR3.250bn (an addition to an existing issuance) with a maturity date of August 24, 2030, and a yield of 4.450%. The QCB clarified that total bids for the sukuk reached approximately QR 14.5bn. (Gulf Times)
- **Qatar to sell QR3bn of 4.3% 2030 Islamic Sukuk on June 16** - Qatar plans to sell QR3bn (\$822.9mn) of 4.3% Islamic Sukuk due Aug. 24, 2030 in an auction on June 16. The sale is a reopening of previously issued securities with 9.756bn riyals outstanding. (Bloomberg)

- **Qatar to sell QR3bn of 5.25% 2028 Islamic Sukuk on June 16** - Qatar plans to sell QR3bn (\$822.9mn) of 5.25% Islamic Sukuk due Sept. 3, 2028 in an auction on June 16. The sale is a reopening of previously issued securities with 6.313bn riyals outstanding. (Bloomberg)
- **QFC contributes 3.5% to Qatar's non-oil GDP** - Qatar Financial Centre (QFC) published its Economic Impact Assessment Report showing that QFC contributed to 2.2% of total GDP and 3.5% of non-oil GDP. These figures represent a 13% increase in GVA compared to 2022, reflecting QFC's growing role as a driver of economic activity in Qatar. QFC's contribution to Qatar's economy extends well beyond its immediate operations, flowing through multiple layers of economic activity. The direct activity of QFC-registered firms, which collectively managed \$41.6bn in assets and generated \$5.8bn in revenues in 2024, is only part of the picture. The ripple effect of their local procurement and the spending power of their employees further amplify QFC's overall economic footprint across sectors such as retail, housing, and services. The report also highlights the growing scale of economic activity within the QFC ecosystem, with QFC-registered firms employing 44,178 people across Qatar in 2024, representing an increase of 34% since 2022. This growth reflects the expanding base of firms choosing to establish and grow their operations through QFC, drawn by its enabling business environment and access to Qatar's dynamic market. Growth has been particularly strong in consultancy, digital, media, insurance, corporate banking, and holding companies. Beyond these figures, the report reflects QFC's structural role as a gateway connecting international investors and businesses to Qatar, facilitating access to capital and supporting knowledge transfer across sectors. (Qatar Tribune)
- **Edaa advances Qatar's capital market infrastructure in collaboration with LSEG** - The London Stock Exchange (LSEG) on Monday welcomed Edaa, Qatar's central securities depository, to open trading — marking a new chapter in a collaboration to modernize and transform Qatar's post-trade infrastructure, reshaping the foundations of the country's capital markets and connecting them more closely to the world. Edaa began as a central securities depository. Today it stands as an integrated post-trade market infrastructure institution at the heart of Qatar's financial transformation — safeguarding securities, sharpening operational efficiency, broadening investor services, and anchoring the trust on which capital markets are built. At the center of that progress is Edaa's Financial Market Infrastructure (FMI) Transformation Program: a comprehensive, end-to-end modernization of the systems that sit beneath Qatar's markets. Leveraging LSEG Markets Technology, Edaa is deploying a new post-trade technology suite across its operations. The program unifies functions that have traditionally run on separate systems. Qatar is adopting the full LSEG Markets Technology suite, a unified, end-to-end platform supporting the full trade lifecycle, including trading, clearing, settlement and depository services. For the market, that integration is the substance behind the vision — fewer points of friction, faster and more resilient settlement, a single consolidated view for investors and participants, and operations aligned with international best practice and global standards of resilience, transparency and risk management. For investors, the program delivers a more seamless, integrated experience and broader access to services — for issuers and for local and foreign investors alike. For market participants, it brings greater operational efficiency, stronger risk controls, and the confidence that comes from infrastructure built to international standards. For Qatar's capital markets as a whole, it provides a platform with the capacity to support new instruments, deeper liquidity, and the next phase of growth. The transformation also lays the groundwork for

Qatar's next major milestones: the introduction of a central counterparty (CCP) and a modern central securities depository and securities settlement system. Together, these will bring central clearing and risk mutualization to the market and a depository rebuilt to international standards — reducing counterparty risk, strengthening settlement resilience, and aligning Qatar's post-trade environment with the world's leading financial centers. HE the Deputy Governor of the Qatar Central Bank and Chairman of Edaa, Sheikh Ahmed bin Khalid bin Ahmed bin Sultan al- Thani commented: "Edaa's progress reflects the ambition of Qatar's financial sector and the goals of the Qatar Financial Sector Strategy and National Vision 2030. "We have not simply replaced a system — we have rebuilt the foundations of our market on infrastructure that meets the highest international standards, and that opens the path to a central counterparty and a modern depository for Qatar. Sheikh Ahmed said: "This collaboration strengthens our capital markets, deepens Qatar's connection to global finance, and gives every investor and participant a more integrated, more resilient market to rely on. The future of market infrastructure belongs to institutions that never stand still — and Edaa intends to lead." Edaa CEO, Sheikh Mohammed bin Jassim al-Thani said: "Opening the London market is a proud moment for Edaa and for Qatar. We began as a securities depository; today we are building towards a single, integrated post-trade platform that brings clearing, settlement and depository together in one place. That is what modern market infrastructure looks like: secure, resilient and connected to the world. Our collaboration with LSEG is the engine behind that ambition — and behind the next phase of growth for our market." London Stock Exchange CEO, David Schwimmer said: "Edaa's transformation is a significant milestone for Qatar's capital markets. By bringing together trading, clearing, settlement and depository on a single platform powered by LSEG Markets Technology, the market is better positioned for resilience, efficiency and future growth. We are excited and proud to support this journey as Qatar continues to strengthen its global connectivity and competitiveness." That ambition reached a defining moment with Edaa's move to its new home, Edaa Hub, and the commencement of the FMI Transformation Program. This is far more than a technology upgrade. It is the foundation for deeper capital markets, stronger post-trade infrastructure, and a more dynamic, globally connected financial ecosystem for Qatar — advancing both the Qatar Financial Sector Strategy and Qatar National Vision 2030. (Gulf Times)

- **US, Iran to sign deal in Switzerland on Friday after Qatar's mediation** - The United States and Iran have reached a peace agreement ending more than three months of war, Pakistan's Prime Minister Shehbaz Sharif announced early today, with both sides declaring an immediate and permanent halt to military operations on all fronts, including in Lebanon. President Donald Trump also seconded it, saying a peace deal with Iran is "now complete," whilst also announcing the Strait of Hormuz open and that the United States will lift its naval blockade. "The Deal with the Islamic Republic of Iran is now complete. Congratulations to all!" Trump said on his Truth Social network. The two countries will sign the deal on Friday, June 19, in Switzerland. "I hereby fully authorize the toll free opening of the Strait of Hormuz, and, simultaneously herewith, authorize the immediate removal of the United States Naval blockade. Ships of the World, start your engines. Let the oil flow!" The breakthrough, revealed by the Pakistani prime minister in a social media post, caps an intensive diplomatic effort in which Qatar, Saudi Arabia and Turkiye played central mediating roles alongside Pakistan. An official signing ceremony is set for Friday, June 19, in Switzerland. The Iranian state TV also confirmed that "the war has ended". The

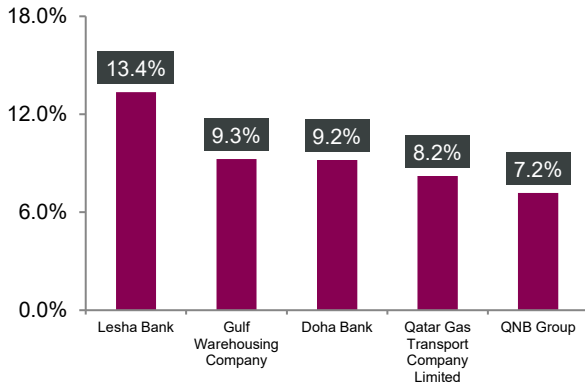

Deputy Iranian Foreign Minister disclosed that Iran yesterday held several hours of talks with the Qatari delegation in Tehran to discuss the memorandum of understanding and its observations on it. He also said that over the past few days, Iran had also held extensive discussions with both Qatar and Pakistan regarding the memorandum of understanding. It was echoed in the Pakistani prime minister's tweet. "Following intensive talks, we are pleased to announce that the Peace Deal between the United States of America and Islamic Republic of Iran has been REACHED," Shehbaz wrote. "Both sides have declared the immediate and permanent termination of military operations on all fronts, including in Lebanon." The prime minister singled out Qatar's role for particular praise, extending "sincere appreciation to our brothers in this mediation effort, the great leadership of State of Qatar, for their support in reaching this agreement". He also thanked "the visionary leadership of Kingdom of Saudi Arabia and Republic of Türkiye for their immense contributions", and credited Washington and Tehran for their commitment to a diplomatic solution. The announcement comes after days of mounting momentum — and last-minute turbulence — in the talks. Qatari negotiators had flown to Tehran at the weekend to help finalize the agreement, while a strike on Beirut's southern suburbs had briefly cast doubt over the timeline and drew a sharp protest from Iran. With the agreement now in place, Shehbaz said mediators would facilitate a series of meetings this week. "These pre-implementation discussions will lay the foundation for the technical talks and the official signing ceremony," he said. The deal would bring to a close a conflict that erupted with US Israeli strikes on Iran and killed thousands, mostly in Iran and Lebanon. Iran had struck Israel and Gulf states hosting US bases and effectively blockaded the Strait of Hormuz, a vital artery for global oil supplies, sending energy prices higher. The US had responded by blocking Iranian ports. Under draft terms described earlier by sources close to the negotiations, Washington would release frozen Iranian assets and waive sanctions on Iranian oil exports in return for Tehran reopening the strait, with Iran's nuclear program to be addressed in a subsequent phase of talks. *The Wall Street Journal also reported yesterday that US President Donald Trump plans to issue a statement imminently confirming that the US has agreed to a deal with Iran. Trump told the Journal the deal will either be signed electronically by himself or Vice President JD Vance. Iran's Fars news agency, citing an informed source, said yesterday Iran has not yet made a final decision on the framework agreement, with reviews of its political, legal and technical aspects under way. Earlier yesterday, Iranian negotiator Mohammad Baqer Qalibaf said Israel's latest attack on the southern suburbs of Beirut, which Israel said targeted Iranian-backed Hezbollah militants, showed the United States lacks "the will and ability to fulfill your commitments" in a post on X. (Gulf Times)

- **Total residential sales value reaches QR6.2bn in Q1 2026** - The residential transaction volumes reached 1,582 during the first quarter (Q1) of this year showing that the activity remained resilient on an annual basis with transaction volumes increasing by 15% compared to Q1 2025. Qatar's residential property market experienced a moderation in activity during first quarter (Q1) of 2026 as the regional conflict weighed on business confidence, investor sentiment and consumer decision-making, according to the latest Qatar Real Estate Market Review from global property consultancy Knight Frank. Compared to the fourth quarter (2,047 transactions) of last year it witnessed a decline of 23%. The total value of residential sales reached approximately QR6.2bn during the first quarter, down 15% quarter-on-quarter from QR7.2bn in Q4 2025, reflecting the more cautious investment environment and softer buyer activity. Doha remained the center of residential market activity, recording

512 transactions with a combined value of approximately QR2.6bn, while Al Rayyan ranked as the second most active municipality, with 280 transactions valued at QR1.38bn, the report noted. The average villa prices declined by 3.5% year-on-year to QR6,626 per square meter, while apartment prices fell by 1.7% to QR13,049 per square meter. Despite broader market softening, prime waterfront locations continued to outperform, with The Waterfront recording average apartment prices of QR15,194 per square meter. Qatar's mortgage market presented a mixed picture during the quarter. While the number of mortgage transactions fell by 12.4% year-on-year to 283, the total value of mortgages issued increased by 85% year-on-year to approximately QR17.2bn, suggesting continued financing activity for larger and higher-value residential assets. The residential leasing market also softened during Q1 2026. Average villa rents declined by 8.9% year-on-year to QR13,908 per month, while apartment rental rates fell by 13.3% quarter-on-quarter to QR9,492 per month as occupiers adopted a more cautious stance amid heightened uncertainty. The market review further said that Qatar's office market remained relatively stable, with average office rents declining by 3.2% year-on-year to QR77 per square meter per month. Demand continued to be concentrated within prime locations such as West Bay and Lusail, while secondary office locations experienced greater rental pressure due to elevated vacancy levels and increasing competition from newer Grade A developments. Meanwhile, retail rents declined by 4.6% quarter-on-quarter to an average of QR195 per square meter per month as retailers remained focused on operational efficiency and cautious expansion plans. TECHNICAL ANALYSIS OF THE QSE INDEX

Source: Bloomberg

The Index rose by 2.4% from the week before, and it printed 10,510.9 at the close. We remain to have a positive outlook and we reiterate our previously reported view that clearing the 11,000 level means chances for the continuation of the longer-term uptrend are more likely to shape. We target the 11,300 level is next expected resistance. Our support level remains at the 10,000 points.

DEFINITIONS OF KEY TERMS USED IN TECHNICAL ANALYSIS

RSI (Relative Strength Index) indicator – RSI is a momentum oscillator that measures the speed and change of price movements. The RSI oscillates between 0 to 100. The index is deemed to be overbought once the RSI approaches the 70 level, indicating that a correction is likely. On the other hand, if the RSI approaches 30, it is an indication that the index may be getting oversold and therefore likely to bounce back.

MACD (Moving Average Convergence Divergence) indicator – The indicator consists of the MACD line and a signal line. The divergence or the convergence of the MACD line with the signal line indicates the strength in the momentum during the uptrend or downtrend, as the case may be. When the MACD crosses the signal line from below and trades above it, it gives a positive indication. The reverse is the situation for a bearish trend.

Candlestick chart – A candlestick chart is a price chart that displays the high, low, open, and close for a security. The ‘body’ of the chart is portion between the open and close price, while the high and low intraday movements form the ‘shadow’. The candlestick may represent any time frame. We use a one-day candlestick chart (every candlestick represents one trading day) in our analysis.

Doji candlestick pattern – A Doji candlestick is formed when a security’s open and close are practically equal. The pattern indicates indecisiveness, and based on preceding price actions and future confirmation, may indicate a bullish or bearish trend reversal.

Shooting Star/Inverted Hammer candlestick patterns – These candlestick patterns have a small real body (open price and close price are near to each other), and a long upper shadow (large intraday movement on the upside). The Shooting Star is a bearish reversal pattern that forms after a rally. The Inverted Hammer looks exactly like a Shooting Star, but forms after a downtrend. Inverted Hammers represent a potential bullish trend reversal.
